

delivers Osprey POS System with Drivers License Scanning for Age Verification to Third Base Grocery

To Prospective Clients **CRS** ,

I purchased the Age Verifier System for my convenience store to protect my business from employees making a mistake in selling age restriction products to minors. The Age verifier is a must for any business that sells age restricted items. It is quick and accurate in determining the age of a customer. We use it 100% for alcohol and tobacco products no matter how old the customers seems to appear. Benefits are numerous for your business and the customer. We have even had customers thank us for reminding them their ID is expired.

It not only protects the employee and the business from fines and legal action but also keeps adult products out of the hands of minors and allows the parents of these children to be more comfortable in patronizing my business.
